

### LET MICROSOFT TEAMS BE A PART OF YOUR TELEPHONE SOLUTION

Microsoft Teams is a state-of-the-art Office 365 collaboration platform with chat, conversations, meetings, and loads of smart and intelligent features that suit modern workgroups and organizations. With Cellips integration, you allow Microsoft Teams to become part of your phone solution

#### Common Call Features

Transfer, park and resume calls with a single press. Answer calls from group numbers and call queues, either with Teams or your mobile phone. Let your assistant handle your calls. Call in to Team Meetings, and more..

**Voice messages** Benefit from a built-in voice messaging feature, integrated with Office 365, to quickly reply to missed calls.

#### Built-in security

Protect your company with enhanced security features, encryption and security protocols, traceability and control, GDPR compliance, secure logins, and more.

#### Optional devices

Choose which devices you want to use for phone calls, IP phones, Windows computers or tablets, Macs or iPhone / iPad, Android phones or tablets.

#### Reports and statistics

View usage reports to track active users, call costs, sessions, client device information, call quality plus several other types of activities.

#### Identity Management

Identity management is managed by Azure Active Directory, either synced with an on-prem AD or completely in the cloud.

### CLOUD-BASED PHONE SYSTEM TO MICROSOFT TEAMS TELEPHONY

Cellips proven and stable cloud-based phone system, which is used by over 3000 companies in their daily telephony solution, is integrated with Microsoft Teams. You get a cloud-based phone system that has developed gradually over 10 years and meets all the demands of a modern company along with the newest technology such as Microsoft Teams, giving your company all the prerequisites for digitalization and innovation to evolve forward.
