

### MICROSOFT CLOUD PBX PHONES SYSTEM IN OFFICE 365

Operate your business phone system in the cloud and eliminate the need for a traditional PBX hardware with the associated maintenance burden. Since Microsoft Phone System is built in Office 365 your system is always up to date with state-of-the-art features together with world-class security and availability.

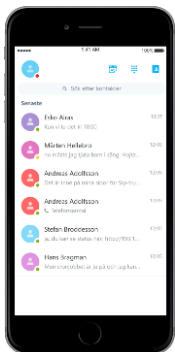

Let Skype for Business Online in Office 365 handle all the telephony for your users. With Cellip's Cloud PBX Connect service for Office 365 we provide full PSTN/telephony functionality. We offer the same functionality as a traditional PBX, such as response groups, various call handling features, contact center, mobile integration and much more.

- Cloud PBX is telephony in Skype for Business Online
- With Cloud PBX you can dial both domestic and international phone numbers from your Skype for Business client
- Cloud PBX is included in the Office Office E5-plan and can be purchased as an add-on to other E-plans
- Cloud PBX with Cellip Cloud PBX Connect gives you the most advanced cloud voice solution on the market, letting you choose DID numbers from 60+ countries

### CELLIP + SKYPE FOR BUSINESS = A PERFECT MATCH

Cellip are Skype for Business experts. There is no one in Sweden who know telephony and Skype for Business as well as we do. We are the experts who always assume your needs and recommend the solution that's best for you.

### MOBILE SUBSCRIPTION FROM CELLIP MAKES YOUR SOLUTION COMPLETE

Cellip's packages with mobile subscriptions in Cloud PBX makes your solution complete. Together with Competella, your operators can see if a colleague is busy in a mobile phone-, fixed- or Skype call and can make the right choice every time. Mobile subscriptions are tied together with the Cloud PBX-fixed number to provide a flexible solution in terms of call functionality.

### COMPETELLA - A MUST FOR THE ADVANCED CUSTOMER

With Competellas Unified Communications Suite, we can migrate your old PBX phone system to Office 365 and Cloud PBX. This allows you to both maintain and expand functionality as contact center, a receptionist, and agents.

### CUSTOMER CASE

Cellip has helped Netel migrate their telephony for more than 400 users to Office 365 Cloud PBX.

*"The fact that we now can relocate our telephony to Microsoft Cloud PBX together with Cellip Cloud PBX Connect is both a part of our overall cloud strategy as well as the next natural step after having migrated Exchange to the cloud.*

*Cellip meet the high demands we make on our suppliers, exactly as we ourselves strive to do while serving our clients."*

Fredrik Thorning  
IT Manager at Netel Group
